DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to a system for fingerprint verification within a networked environment, classified in class 713, subclass 202.
 - II. Claims 11-16, drawn to a remote method of fingerprint verification, classified in class 713, subclass 182.
 - III. Claims 17-31, drawn to a camera device, classified in class 713, subclass 186.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a networked system of fingerprint verification. Invention II has separate utility such as authenticating fingerprints remotely and independently of another system. Invention III has separate utility such as capturing images. See MPEP § 806.05(d).
4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II or III, restriction for examination purposes as indicated is proper.

Art Unit: 2134

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
